

# NOTICE OF COMPLETION

## Wanatango Falls Waterpower Project – Frederick House River

**June 30, 2014** - Xeneca Power Development Inc. ("Xeneca") is proposing to build a modified run-of-river hydroelectric generating station (Wanatango Falls GS) with a total installed capacity of 4.67 MW. The project's proposed location is on the Frederick House River in Mann Township, 26 km northwest of Iroquois Falls and 22 km south of Cochrane. The proposed project is subject to provincial environmental assessment requirements under the *Environmental Assessment Act*. An Environmental Report ("ER") has been prepared as required under the Class Environmental Assessment for Waterpower Projects (Class EA.) The proposed project has been reviewed in a process consistent with the Class EA, the results of which are described in the ER. The ER concludes that there are no significant adverse effects after the application of mitigation and adaptive management measures. The Wanatango Falls GS is categorized as a project on a managed waterway pursuant to the Class EA.

It is expected that Xeneca will meet the intent of water management planning through the EA process and MNR's subsequent review and approval of the project under the Lakes and Rivers Improvement Act (LRIA.)

In compliance with the Class EA, the ER will be available for a 37-calendar day review period from June 30, 2014 through to August 5, 2014. Xeneca must receive all comments in writing regarding the proposed project and/or the ER no later than 11:59 pm on August 5, 2014.

The Environmental Report may be viewed electronically at: [www.xeneca.com](http://www.xeneca.com).
